

Precision Erection Company, Inc.  
Post Office Box 559  
Key Village Office Park  
Russell Springs, Kentucky 42642

Attention: Mr. Stephen P. Branscum

Dear Steve:

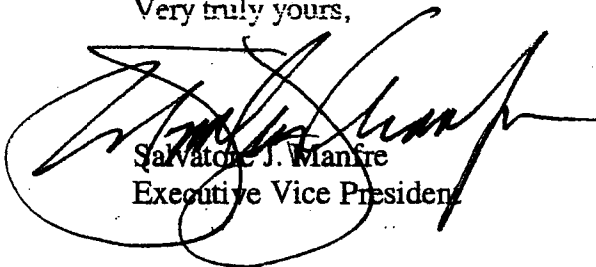

I would like to take this opportunity to congratulate Precision Erection Company, Inc. on the performance of their work at the Lafarge Gypsum Facility in Silver Grove Kentucky, for the construction of the 575,000 Square Foot pre-engineered metal building. This building includes storage and equipment that makes this facility the fastest gypsum wallboard plant anywhere.

Your personal attention to details, schedules, and any critical matters that occurred, during the course of this job, were appreciated by me and were handled expeditiously and forthright.

Your performance along with your intensity to maintain our relationship allowed Precision Erection Company, Inc. to couple the Silver Grove project with a duplicate Lafarge Gypsum Facility in Palatka, Florida.

It was a pleasure working with you and your company and look forward to future work with your company.

Very truly yours,

Salvatore J. Manfre  
Executive Vice President
